or visit <http://www.knpb.org/knpbcampus/e4e/>.

Registration and directions can be found at
<http://moodle.washoeschools.net/new/>.

e4e offers Nevada teachers online professional development classes that can be done according to your schedule each week. Each course was created by educators, for educators. e4e is a collaboration of KNPB Channel 5 Public Television, Washoe County School District and Elko County School District.

All courses are:

- Taught by trained online professional developers
- Delivered 100% online
- \$70 per course
- Six weeks in duration (weekly assignments will be given and can be done at your convenience during that week)

→ Course Descriptions ←

Financial Literacy

Facilitator: Sara Stewart-Lediard

This course will introduce classroom teachers to basic personal finance concepts and principles that can be used in everyday lessons and activities. The course will present personal finance and economic vocabulary that can be used in daily classroom discussions. Students need to learn how to make sound decisions by accessing and assessing consumer information and comparing and evaluating goods and services.

You can plan on spending approximately 5-7 hours* per week on your course. You will earn two in-service credits (CEUs) upon successful completion of the course. If you would rather earn college credit, you can earn two Southern Utah University (SUU) credits for an additional \$42. The SUU fee will be paid once class begins.

(*Time spent per week may be more than 5-7 hours depending upon your technical abilities, reading speed, and processing speed.)

CEUs can be used for renewing your teaching certificate. SUU credits **may** be able to be used to move over on the pay scale. You will want to check with your district. SUU credits cannot be used toward a degree and are a 5000 level course.

Flipped Classroom Instruction

Facilitator: Toni Rader

It is important that school leaders stay abreast of the newest trends in education and to gain the necessary knowledge to inform and assist fellow educators choosing to implement new methods of instruction. In this course, school leaders will be introduced to the flipped classroom approach to instruction. According to the Center for Teaching at Vanderbilt University, "“flipping the classroom” means that students gain first exposure to new material outside of class, usually via reading or lecture videos, and then use class time to do the harder work of assimilating that knowledge, perhaps through problem-solving, discussion, or debates."

Reading and Writing in the Digital Age

Facilitator: Fawn Canady

This course is designed to strengthen participants' understanding of how literacy has evolved in the 21st century and explore in depth the definition of digital literacy. Participants will delve specifically into the demands, abilities, and competencies required for digital literacy, focusing on digital reading and writing and the technology tools that enhance student digital reading and writing experiences. This course will share strategies for publishing work with authentic audiences in ways that support connected, meaningful learning.
